```
        connection.Close();
       autoCatid();

     }
     catch (Exception e1)
     {
        MessageBox.Show("error");
        connection.Close();
     }
   }
```

Select Category:-

```
private void comboBox1_SelectedIndexChanged_1(object sender, EventArgs e)
    {
      connection.Open();
      string CmdString = "select cat_id from category where cat_name
='" + catNameBox.Text + "'";
      MySqlDataAdapter sda = new MySqlDataAdapter(CmdString, connection);
      DataSet ds = new DataSet();
      sda.Fill(ds, "category");

      if (ds.Tables[0].Rows.Count > 0)
      {
        txtCatId.Text = ds.Tables[0].Rows[0][0].ToString();
      }
      connection.Close();
    }
```

Select Menu:-

```
    private void select_Click(object sender, EventArgs e)
    {
        Try
        {
              connection.Open();
              string CmdString = "select * from itemtable where item_id="
        + itemId.Text + "";
```
